Ved Malik

Subject: PM 1696
Isolation of Putrescine N-Methyltransperase DNA Sequence ;
General Foreign Filing

Dear Mr. Malik,

We are proceeding with the filing of foreign patent applications that are counterparts to the above-identified U.S. patent application.

These applications name you as an inventor, together with Samir Wahab.

Could you please help us complete the execution of several formal documents relating to these foreign patent applications (copies attached for your information). May I suggest that we meet for that purpose at the lobby of the Philip Morris Research and Development Center on Monday morning, June 27, at 10:00 AM or any other such time or place that may be more convenient to you. Please call me at the above telephone number or Chris Hardin at 274-2823 to confirm a time or place.

~~I do not perceive a need to address any other matter other than to obtain~~ The proposed meeting will be limited to obtaining your signatures on formal patent documents, which exercise we have undertaken in the past with respect to the original U.S. patent application. The effort would be consistent with your obligations under your employment agreement with Philip Morris and ~~your~~ the accord that you had ~~reached~~ negotiated with Eric Taussig.

Thank you for your attention and cooperation with this matter, and please do not hesitate to call me to rearrange the time or place or to discuss the matter.

Very truly yours,

Charles E. B. Glenn
